

**JURUNATURE** SDN BHD  
Your First Choice Partner in Oil and Gas

# Jurusphere<sup>™</sup> Tender Management System (TMS)

Intelligent. Secure. Automated

## Our Company

**JURUNATURE** is dedicated to serving the Oil & Gas, Petrochemical, and Marine industries. Since 2000, we have specialised in delivering customised solutions that ensure the comprehensive protection and optimisation of industry assets. With a wide range of innovative and diversified offerings, **JURUNATURE** continues to fulfil its vision of being the industry's First-Choice Partner in Oil & Gas.

From our beginnings as a niche product trading company in Malaysia, **JURUNATURE** has evolved into a leading provider of comprehensive products and services across Malaysia and Southeast Asia. Today, our offerings extend beyond traditional engineering and asset protection solutions to include

best-in-class ICT capabilities such as Data Warehousing, Mobile Application Development, System Integration, and Networking Services. These digital solutions are designed to complement and enhance operational excellence, data visibility, and decision-making across daily operations.

Through continuous research, development, and innovation, **JURUNATURE** delivers future-ready solutions that meet the evolving technical and digital needs of our customers, reinforcing our vision to be the industry's First-Choice Partner in Oil & Gas.

## Jurusphere™ Tender Management System

The AI-Powered Tender Management System (TMS) is an intelligent digital platform designed to automate, streamline, and optimise the entire tender lifecycle using Artificial Intelligence and smart automation.

By combining AI-driven insights, document intelligence, and automated workflows, TMS significantly reduces manual effort, enhances accuracy, and enables faster, data-driven tender decisions.

*No matter how your tenders are managed today, a powerful Tender Management System (TMS) transforms the way you work by :*

Centralise all tender documents and data in one intelligent platform.

Access tender information securely, anytime and anywhere.

Protect sensitive data with enterprise-grade security and encryption.

Ensure compliance across every stage of the tender process.

# Why Tender *Jurusphere* Management System?

## 1 Replace manual spreadsheets and email-based tender tracking

Eliminate fragmented spreadsheets and scattered email threads by managing all tenders through a single, centralised platform. Gain real-time visibility into tender status, deadlines, documents, and communications while reducing manual effort, errors, and missed opportunities.

## 2 Ensure secure, role-based access to sensitive documents

Protect sensitive tender documents with robust, role-based access controls that define who can view, edit, approve, or manage information. This ensures confidential data is accessible only to authorised users, enhances accountability through controlled permissions, and maintains a high level of security.

## 3 Accelerate tender processing and decision-making

Streamline the entire tender lifecycle through automated workflows, real-time tracking, and intelligent insights. This reduces manual delays, improves coordination between teams, and enables faster, more informed evaluations, approvals, and decision-making.

## Key Benefits

- ✔ **Centralised tender repository**  
Store all tender documents and data in one central repository for easy access, better control, and improved collaboration.
- ✔ **Secure document sharing & access control**  
Enable secure document sharing with controlled access, ensuring only authorised users can view or manage tender information.
- ✔ **Real-time status tracking**  
Track tender progress and updates in real time for better visibility and timely decision-making.
- ✔ **AI Based Automated email fetching**  
Automatically capture and organise tender-related emails using AI, ensuring no critical communication is missed.
- ✔ **Comprehensive reporting & insights**  
Gain comprehensive reports and actionable insights to analyse tender performance and support informed decisions.
- ✔ **Assist in tracking opportunities and avoid missing any potential business**  
Identify and track tender opportunities effectively, ensuring no potential business is overlooked.

# Core System Modules

## 1 Dashboard

**A unified, real-time dashboard providing instant visibility into:**  
 Active, upcoming, and closed tenders  
 • Tender deadlines tracking

## 2 User Access Control

**Role-based access ensures data security and accountability:**  
 • Controlled access to tenders and documents

# 3 Tender Management

## 9 Tender Report

The screenshot displays a dashboard titled 'Return to Tender List'. It includes several key components:

- Marks:** Total Overall Quoted to Date - Firm Bid Only (RM) 1,369,450.14; Total Value -> RM100K Quoted to Date - Firm Bid Only (RM) 4,565,873.04; Total Value Awarded to Date.
- Ranking:** Client Ranking by Total Value Quoted >= RM 100K - Firm Bid Only (LOREEM IPSUM COMPANY, RM 680,000.00); Client Ranking Table by Volume Received >= 5 Units (LOREEM IPSUM COMPANY, 31; LOREEM IPSUM COMPANY, 23).
- Bar Chart:** Bar Chart of Client Ranking by Total Value Quoted >= RM 100K - Firm Bid Only.
- Table:** A table with columns: Month-Year, Received (unit), Avg Received Per Day (unit), Open for Submission in (unit), Declined/Unattended (unit), To Update Status in System (unit), Submitted (unit), Submitted Value Firm Bid Only (unit), Awarded (unit), Awarded Value (RM), Lost (unit), Lost Value Firm Bid Only (RM), To Follow Up with Client (RM).

A comprehensive reporting module delivering clear insights into tender activities:

- Generate detailed tender reports and summaries
- Track performance, status, and outcomes

## 10 Email Fetching

The screenshot shows the 'List of Tender' interface. It features a sidebar with navigation options like 'Dashboard', 'Users Access Control', and 'Tender Management'. The main area displays a table of fetched emails:

#	Ref No	Client's Ref No	Email Subject	Project Name	Email Sender	Client
1	45870010	Q710145	Bulk Order - Request Ordering	EXI HARDWARE	exihardware@gmail.com	EXI HARDWARE

Buttons for '+ Add New', 'View Pending (0)', 'View Report', and 'Excel Builder' are visible above the table.

An intelligent email integration module that captures tender communications automatically:

- Automatically fetch tender-related emails
- Add New to add normally
- Organise and link emails to relevant tenders

## Conclusion

The Tender Management System is a powerful digital solution designed to transform the way organisations manage tenders. By automating processes, centralising information, and delivering real-time visibility, it eliminates inefficiencies, reduces risk, and shortens tender cycles.

Built with enterprise-grade security, compliance controls, and intelligent reporting, the system ensures complete transparency and confidence at every stage of the tender process. Teams collaborate more effectively, decisions are made faster, and opportunities are never missed.

With the Tender Management System, organisations gain greater control, higher productivity, and measurable business impact—turning tender management into a strategic advantage that drives growth and competitive success.
