

JURUNATURE SDN BHD
Your First Choice Partner in Oil and Gas

JuruSphere[™] Smart Tender Management

Intelligent. Secure. Automated

Our Company

JURUNATURE is dedicated to serving the Oil & Gas, Petrochemical, and Marine industries. Since 2000, we have specialised in delivering customised solutions that ensure the comprehensive protection and optimisation of industry assets. With a wide range of innovative and diversified offerings, **JURUNATURE** continues to fulfil its vision of being the industry's First-Choice Partner in Oil & Gas.

From our beginnings as a niche product trading company in Malaysia, **JURUNATURE** has evolved into a leading provider of comprehensive products and services across Malaysia and Southeast Asia. Today, our offerings extend beyond traditional engineering and asset protection solutions to include

best-in-class ICT capabilities such as Data Warehousing, Mobile Application Development, System Integration, and Networking Services. These digital solutions are designed to complement and enhance operational excellence, data visibility, and decision-making across daily operations.

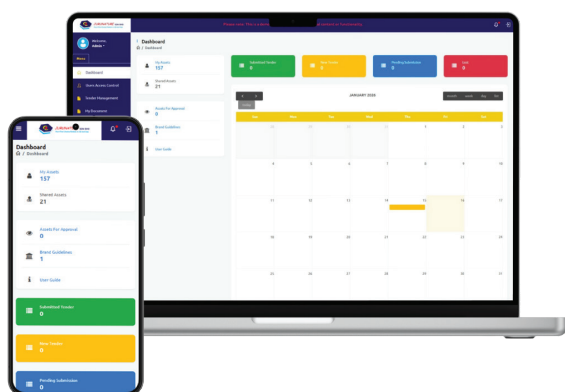

Through continuous research, development, and innovation, **JURUNATURE** delivers future-ready solutions that meet the evolving technical and digital needs of our customers, reinforcing our vision to be the industry's First-Choice Partner in Oil & Gas.

JuruSpherē Smart Tender Management System

The AI-Powered Tender Management System (TMS) is an intelligent digital platform designed to automate, streamline, and optimise the entire tender lifecycle using Artificial Intelligence and smart automation.

By combining AI-driven insights, document intelligence, and automated workflows, TMS significantly reduces manual effort, enhances accuracy, and enables faster, data-driven tender decisions.

No matter how your tenders are managed today, a powerful Smart Tender Management System (STMS) transforms the way you work by :

Centralise all tender documents and data in one intelligent platform.

Access tender information securely, anytime and anywhere.

Protect sensitive data with enterprise-grade security and encryption.

Ensure compliance across every stage of the tender process.

JuruSpherē Smart Tender Management System

1 Replace manual spreadsheets and email-based tender tracking

Eliminate fragmented spreadsheets and scattered email threads by managing all tenders through a single, centralised platform. Gain real-time visibility into tender status, deadlines, documents, and communications while reducing manual effort, errors, and missed opportunities.

2 Ensure secure, role-based access to sensitive documents

Protect sensitive tender documents with robust, role-based access controls that define who can view, edit, approve, or manage information. This ensures confidential data is accessible only to authorised users, enhances accountability through controlled permissions, and maintains a high level of security.

3 Accelerate tender processing and decision-making

Streamline the entire tender lifecycle through automated workflows, real-time tracking, and intelligent insights. This reduces manual delays, improves coordination between teams, and enables faster, more informed evaluations, approvals, and decision-making.

Key Benefits

✓ Centralised tender repository

Store all tender documents and data in one central repository for easy access, better control, and improved collaboration.

✓ Secure document sharing & access control

Enable secure document sharing with controlled access, ensuring only authorised users can view or manage tender information.

✓ Real-time status tracking

Track tender progress and updates in real time for better visibility and timely decision-making.

✓ AI Based Automated email fetching

Automatically capture and organise tender-related emails using AI, ensuring no critical communication is missed.

✓ Comprehensive reporting & insights

Gain comprehensive reports and actionable insights to analyse tender performance and support informed decisions.

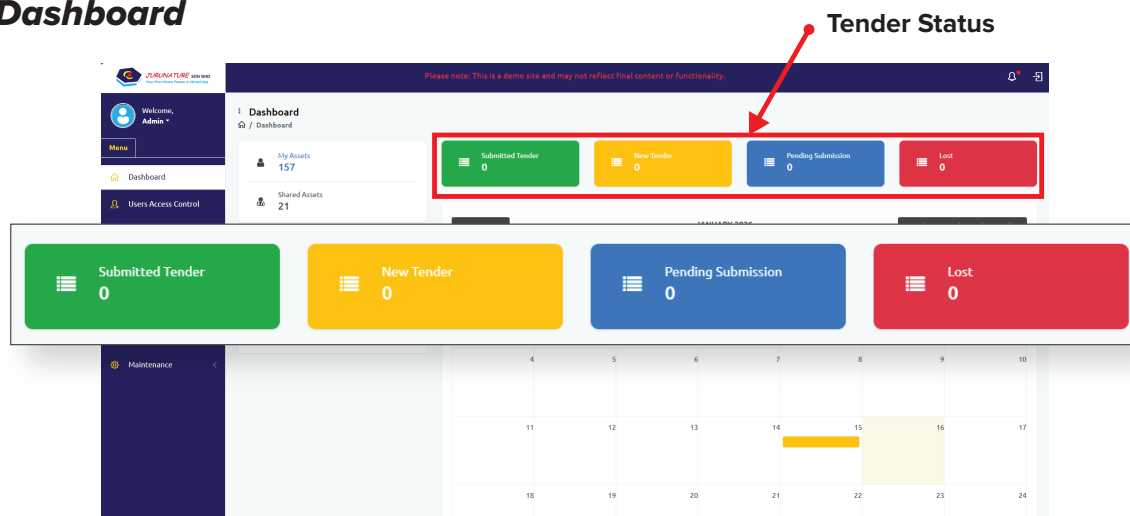

✓ Assist in tracking opportunities and avoid missing any potential business

Identify and track tender opportunities effectively, ensuring no potential business is overlooked.

Core System Modules

1

Dashboard

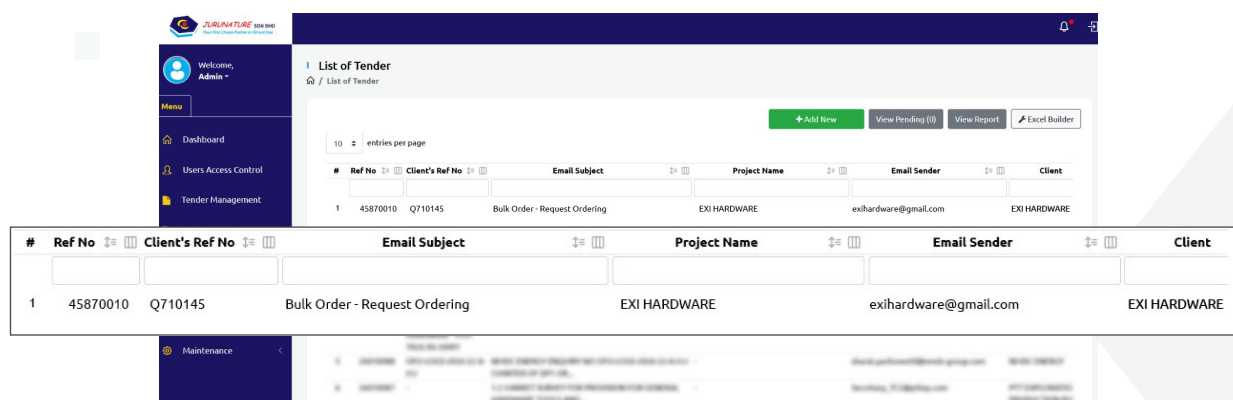

A unified, real-time dashboard that provides clear visibility of all tenders in one place, helping procurement staff and management monitor tender progress, stay organized, and ensure no important deadlines are missed through the Tender Management System.

- View active, upcoming, and closed tenders at a glance
- Track tender deadlines in real time
- Support daily monitoring and better tender control

2

Automatic Email Fetching

The 'List of Tender' module displays a table of tender-related emails. The table has columns for #, Ref No, Client's Ref No, Email Subject, Project Name, Email Sender, and Client. A red box highlights the 'Email Sender' column, which contains the email address 'exihardware@gmail.com'.

#	Ref No	Client's Ref No	Email Subject	Project Name	Email Sender	Client
1	45870010	Q710145	Bulk Order - Request Ordering	EXI HARDWARE	exihardware@gmail.com	EXI HARDWARE

An intelligent email integration module that automatically captures and manages tender-related communications, helping procurement staff and tender officers keep all correspondence organized and easy to find throughout the tender process. This is done within the Tender Management System to reduce manual work, prevent missing important emails, and improve communication tracking.

- Automatically fetches tender-related emails
- Allows users to manually add new emails when needed
- Add new emails manually to ensure complete communication records
- Organises and links emails to the relevant tenders for easy reference

A centralised repository that stores all tender-related documents in one secure place, allowing procurement staff and authorised users to easily upload, manage, and access private working files. This helps keep documents organised, reduce file loss, and improve document control throughout the tender process within the Tender Management System.

- Automatically fetches tender-related emails
- Allows users to manually add new emails when needed
- Organises and links emails to the relevant tenders for easy reference

Core System Modules

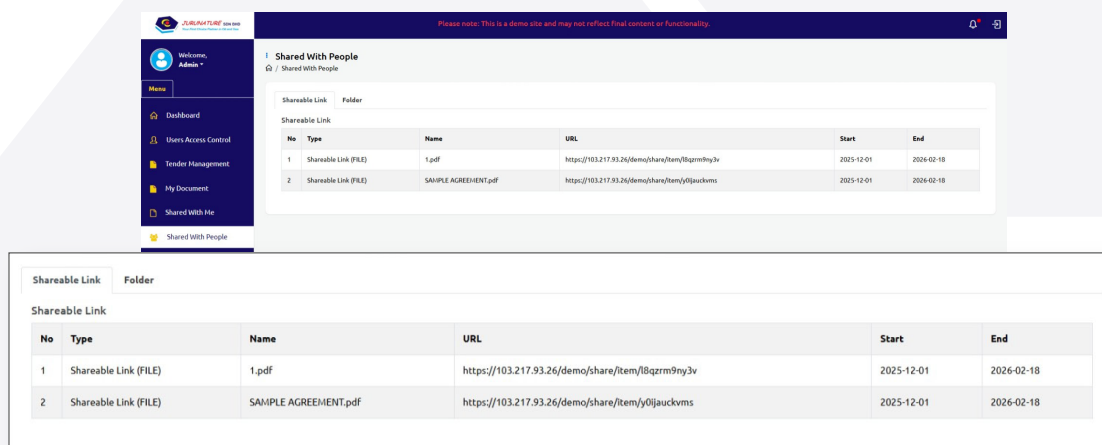

5 Shared Documents With Me

Provides a Document Repository that allows authorised users to view, manage, and share documents securely in one place. It ensures proper access control through read-only or edit permissions, helping procurement teams and stakeholders collaborate efficiently while maintaining document security throughout the tender process.

- Centralised Document Repository
- View and manage shared documents
- Read-only or edit access based on permissions
- Secure collaboration among authorised users

6 Shared Document With People

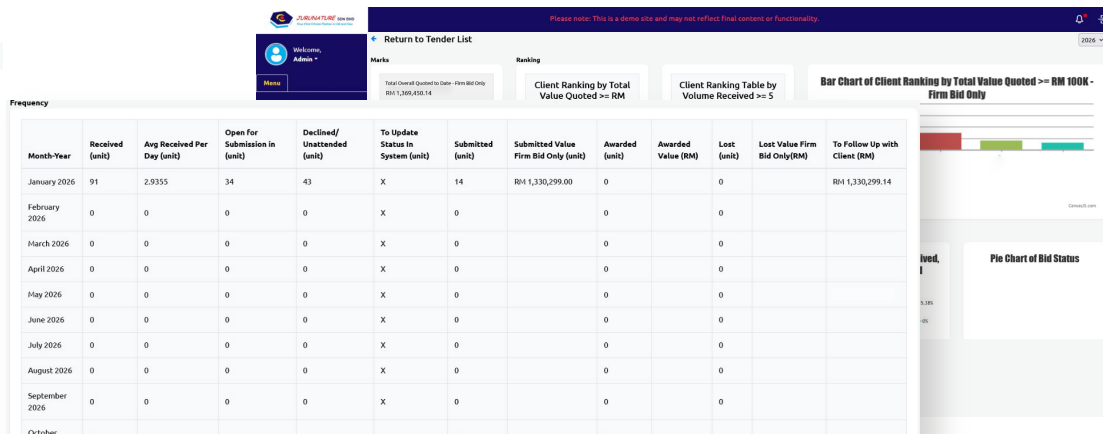

Grants users to view and manage documents shared by others while controlling how files are accessed and updated. This ensures documents remain organised, secure, and only editable by authorised users, supporting smooth collaboration among procurement teams and stakeholders during the tender process.

- Document Repository
- View and manage shared documents
- Read-only or edit access based on permissions
- Controlled and secure document sharing

Core System Modules

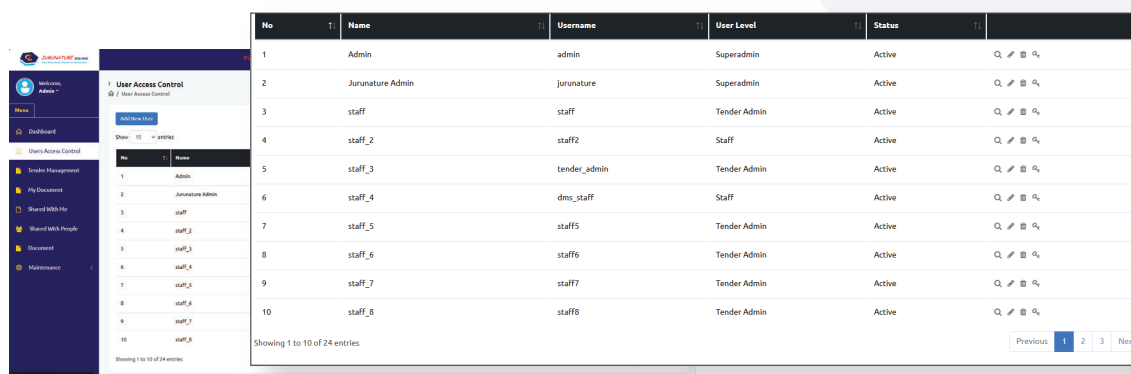

9 Tender Report

Delivers clear and structured insights into tender activities by enabling users to generate detailed reports and summaries while monitoring performance, status, and outcomes throughout the procurement process. This ensures better transparency, performance evaluation, and informed decision-making, supporting procurement teams and management in tracking progress and assessing results during the tender lifecycle.

- Generate detailed tender reports and summaries
- Track performance, status, and outcomes

10 User Access Control

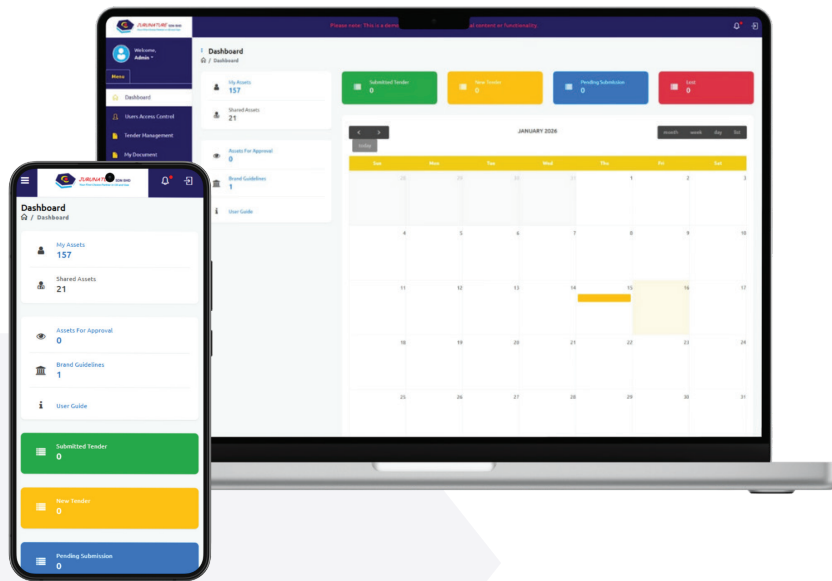

The screenshot displays the 'User Access Control' module interface. It includes a sidebar with navigation options like 'Dashboard', 'Tender Management', 'My Document', 'Shared With Me', 'Shared With People', 'My Account', and 'Relationship'. The main content area shows a table of users with columns for No, Name, Username, User Level, and Status. The table lists 10 users, including Admin, Jurunature Admin, staff, staff_2, staff_3, staff_4, staff_5, staff_6, staff_7, and staff_8. A 'Showing 1 to 10 of 24 entries' message is displayed at the bottom of the table.

No	Name	Username	User Level	Status
1	Admin	admin	Superadmin	Active
2	Jurunature Admin	jurunature	Superadmin	Active
3	staff	staff	Tender Admin	Active
4	staff_2	staff2	Staff	Active
5	staff_3	tender_admin	Tender Admin	Active
6	staff_4	dms_staff	Staff	Active
7	staff_5	staff5	Tender Admin	Active
8	staff_6	staff6	Tender Admin	Active
9	staff_7	staff7	Tender Admin	Active
10	staff_8	staff8	Tender Admin	Active

Ensures data security and accountability by restricting system access based on user roles and responsibilities. This allows only authorised personnel to view or manage specific tenders and documents, reducing risk and maintaining confidentiality. It supports procurement teams, evaluators, vendors, and management by clearly defining permissions throughout the tender lifecycle.

- Controlled access to tenders and documents
- Permission-based user roles
- Secure and accountable system access

Conclusion

The Tender Management System is a powerful digital solution designed to transform the way organisations manage tenders. By automating processes, centralising information, and delivering real-time visibility, it eliminates inefficiencies, reduces risk, and shortens tender cycles.

Built with enterprise-grade security, compliance controls, and intelligent reporting, the system ensures complete transparency and confidence at every stage of the tender process. Teams collaborate more effectively, decisions are made faster, and opportunities are never missed.

With the Tender Management System, organisations gain greater control, higher productivity, and measurable business impact—turning tender management into a strategic advantage that drives growth and competitive success.
